

PRESS RELEASE

COGELEC PARTNERS WITH THE POINT FORT FICHET NETWORK TO ENHANCE HOME SECURITY

Mortagne-sur-Sèvre, France, September 8th, 2025, COGELEC (ISIN: FR0013335742 / Ticker: ALLEC), the French leader in access control for collective housing through its INTRATONE brand, and the Point Fort Fichet network, a specialist in door and lock security, are combining their expertise to offer integrated and innovative security solutions to residents with the KIBOLT HOME connected multipoint lock. This smart device allows users to manage access to their home in a personalized and 100% secure way, whether it's a house or an apartment. COGELEC aims to improve security and simplify daily life for anyone who wants to protect their home, loved ones, and belongings.

A Unique Solution for Front Doors

A pioneer in wireless intercom systems since 2007 with INTRATONE, COGELEC is once again innovating with Kibolt Home, the first intelligent connected lock system. This solution combines COGELEC's technological know-how with the robustness of a Fichet cylinder, a benchmark brand in the door and lock security market.

To ensure quality installation and local service, KIBOLT HOME will be available through the Point Fort Fichet network, known for its expertise and with over 240 retail outlets across the country. Point Fort Fichet offers premium security solutions installed by a network of qualified professionals who provide rigorous after-sales service, giving residents lasting peace of mind. Voted "France's favorite brand" in 2024 in the category of reinforced door and high-security lock manufacturers, Fichet embodies consumer trust and reliability.

Enhanced Security and Everyday Comfort

KIBOLT HOME is a connected multipoint lock that combines advanced technology and robustness for optimal protection. Equipped with 9 locking points and a secure cylinder, it features an intelligent sensor capable of detecting any attempted tampering or suspicious vibration, immediately alerting the occupant. Thanks to its unique mechanical cylinder blocking mechanism, KIBOLT HOME acts as a true barrier against squatting, offering an effective and deterrent response to intrusions.

The lock can be controlled directly from the integrated touchscreen or remotely via the free Kibolt mobile app, available on smartphones and tablets. Access to the home can be granted via fob, mobile device, or mechanical key, catering to all usage preferences, whether connected or traditional.

The Kibolt app also allows remote access management, the definition of personalized time slots, and secure authorization for specific individuals. It also includes a digital peephole with a wide-angle camera, microphone, and speaker, enabling residents to see and communicate with visitors—even remotely.

Thanks to this combination of features, KIBOLT HOME stands out as an innovative, practical, and secure solution that effectively protects home entrances while simplifying daily access management.

With KIBOLT HOME, COGELEC demonstrates its commitment to making security accessible, intelligent, and intuitive.

Roger Leclerc, Chairman and CEO of COGELEC, states: *“We have always been committed to offering solutions that combine innovation and security. With Kibolt Home, we are putting our access control expertise at the service of a product designed to meet users’ real needs. This technological advancement reflects our desire to simplify daily life while enhancing home protection.”*

ABOUT COGELEC

COGELEC is the French leader in access control for collective housing. As early as 2007, COGELEC launched the first all-in-one wireless intercom subscription offer under the Intratone® brand. Now a key player in access control for residential, commercial, industrial, and public buildings, COGELEC markets four brands—Hexact, Intratone, Rozoh, and Kibolt—each with its own area of expertise. Today, COGELEC is the leader in wireless intercom systems, with over 2.6 million homes and professional premises equipped with its solutions. The company holds 64 patents and achieved a turnover of €74.5 million in 2024.
